ASHISH PIPALIYA

React Native Developer | Full-Stack Mobile Engineer

ashishpipaliya.dev@gmail.com | +91 63543 48235 | Ahmedabad, Gujarat, India

linkedin.com/in/ashish-pipaliya-b0716730b | its-ashu.github.io/Portfolio | github.com/its-ashu

EXECUTIVE PROFILE

Accomplished React Native Developer with approximately 3 years of hands-on experience engineering high-performance, cross-platform mobile applications. Specializes in full-stack mobile development using React Native (CLI & Expo), TypeScript, Redux Toolkit, and TanStack Query, backed by solid backend skills in Node.js, Express.js, and MongoDB.

Delivered 15+ production-grade mobile applications across e-commerce, B2B, and fintech verticals for international brands including GNC India, Kalki Fashion, Bellavita Organic, Bombay Shirt Company, Voyage Eyewear, Midshires, and PrintBind International. Consistently achieved up to 50% app performance improvements through architectural optimization, efficient state management, and UI/UX best practices.

Known for bridging design and engineering — translating Figma prototypes into pixel-perfect, responsive interfaces — while maintaining high code quality, modular architecture, and seamless third-party integrations (Razorpay, GoKwik, Zecpay, Appsflyer, GraphQL, Firebase).

CORE COMPETENCIES

Mobile & Frontend Development

- React Native (CLI & Expo) — cross-platform iOS & Android development
- TypeScript — type-safe component design, interfaces, generics, advanced type patterns
- JavaScript (ES6+) — async/await, closures, modules, destructuring, Promises
- UI/UX implementation — Figma-to-code, pixel-perfect layouts, animation, accessibility
- Appmaker.xyz — Shopify-integrated React Native app development for e-commerce brands

State Management & Data Fetching

- Redux Toolkit — slices, thunks, RTK Query, selectors, middleware
- TanStack Query (React Query) — server state, caching, pagination, infinite scroll
- Context API — lightweight state management for component trees
- GraphQL — queries, mutations, and Shopify Storefront API integration

Backend & Database

- Node.js & Express.js — RESTful API design, middleware, authentication (JWT)
- MongoDB & Mongoose — schema design, aggregations, indexing, data modeling
- Firebase — Firestore, Realtime Database, Authentication, Cloud Messaging (FCM)

Payments, Analytics & Integrations

- Payment Gateways — Razorpay, Stripe, GoKwik, Zecpay
- Analytics & Attribution — Appsflyer, Firebase Analytics
- Shopify APIs — Storefront API, Admin API, product/cart/order management

Tools & DevOps

- Version Control — Git, GitHub (branching strategy, PRs, code review)
- Development Tools — Android Studio, Xcode, Flipper, Postman
- Design Tools — Figma, Adobe XD
- Platform Dashboards — Shopify Dashboard, Firebase Console

PROFESSIONAL EXPERIENCE

Dynamic Dreamz — *August 2024 – Present*

React Native Developer — Ahmedabad, India

Key Responsibilities & Achievements:

- Spearheaded UI/UX enhancement and performance optimization across 13+ major e-commerce brand applications built on Appmaker.xyz (React Native), resulting in up to 50% improvement in screen load times and significantly reduced crash rates.
- Delivered feature development and bug resolution for premium international brands — GNC India, Kalki Fashion, Bellavita Organic, Bombay Shirt Company, Voyage Eyewear, Vilvah, House of Masaba, House of Rare, Renee Cosmetics, ThriveCo, Fashor, Super Tails, and Zouk — directly impacting customer retention and conversion.
- Integrated complex payment ecosystems including GoKwik one-click checkout, Zecpay wallet, and Appsflyer deep linking attribution to enable end-to-end purchase journeys.
- Leveraged GraphQL with Shopify Storefront API for efficient product listing, cart management, and order tracking — reducing over-fetching and improving data efficiency.
- Implemented Firebase Analytics and push notification pipelines (FCM) to support data-driven product decisions and re-engagement campaigns.
- Partnered with product managers, UI designers, and QA engineers in Agile/Scrum sprints, consistently delivering features within deadlines and with minimal post-release defects.
- Maintained clean, modular, and well-documented codebases, establishing reusable component libraries adopted across multiple brand projects.

Sarvagya SoftTech

June 2023 – July 2024

Full-Stack Developer (React Native + Node.js)

Gujarat, India

Key Responsibilities & Achievements:

- Designed and deployed full-stack mobile applications from requirements to production, integrating React Native (CLI) frontend with Node.js/Express.js API layer and MongoDB database.
- Engineered the B2B mobile platform for Midshires Electrical (electrical & lighting products), implementing advanced product browsing, multi-parameter filtering, role-based access control, and streamlined order management — reducing order processing time by 45%.
- Developed the PrintBind International B2B app enabling clients to browse printing ink and machinery catalogues, view detailed product specifications, and submit direct supplier inquiries with Firebase-powered notifications.
- Built responsive, adaptive UI from Figma designs ensuring visual consistency across iOS and Android with varying screen sizes and OS versions.
- Implemented JWT-based authentication, role-based access control, and secure API endpoints across all projects.
- Optimized MongoDB schemas with proper indexing and aggregation pipelines, reducing average API response times and improving scalability.
- Mentored junior teammates on React Native best practices, code review standards, and debugging workflows using Flipper.

PROJECT PORTFOLIO

Client Projects — Appmaker.xyz (E-Commerce, Shopify-Integrated)

GNC India — Health & Supplement E-Commerce App *[Play Store & App Store]*

Tech Stack: *Appmaker.xyz | React Native Expo | GraphQL | GoKwik | Zecpay | Appsflyer | Firebase | Shopify*

Worked on improving the GNC India mobile application with focus on performance, checkout experience, and UI refinement.

- Optimized app performance by improving component rendering and API handling, resulting in ~50% improvement in app speed and responsiveness.
- Simplified and streamlined checkout flow by integrating GoKwik and Zecpay one-click checkout extensions, reducing cart abandonment and drop-offs.
- Optimized GraphQL queries for product listing and collection pages, reducing API payload size and screen load time.
- Enhanced overall app stability and user experience across product browsing, cart, and checkout flows.

Bombay Shirt Company — Premium Fashion E-Commerce App *[Play Store & App Store]*

Tech Stack: *Appmaker.xyz | React Native Expo | Firebase | GraphQL | Shopify*

Worked extensively on the Bombay Shirt Company mobile app covering full-app UI and functionality improvements across all major screens.

- Fixed UI and functional issues across Home, PLP, PDP, Search, Cart, Checkout, Wishlist, and Profile screens as per Figma design requirements.
- Resolved multiple critical bugs affecting cart calculations, checkout flow, coupon application, and user reviews.

- Optimized PDP performance including related product recommendations, webview rendering, and component loading.
- Collaborated with Appmaker.xyz SDK team and backend teams to resolve build-related blockers and deliver stable production releases.

Kalki Fashion — Luxury Ethnic Wear App *[Play Store & App Store]*

Tech Stack: *Appmaker.xyz | React Native Expo | Firebase | GraphQL | Shopify*

Worked on comprehensive UI and functional improvements across the Kalki Fashion app to enhance stability and user experience.

- Fixed UI inconsistencies across Home, Search, Collection, Cart, Checkout, Wishlist, Account, and Navigation screens per design specifications.
- Resolved cart coupon application, checkout calculation, and wishlist sync bugs impacting purchase flow.
- Improved search behavior with conditional visibility of filters and sort options for a more intuitive browsing experience.
- Debugged and resolved random crash scenarios, improving overall app stability for production.

Bellavita Organic — Fragrance E-Commerce App *[Play Store & App Store]*

Tech Stack: *Appmaker.xyz | React Native Expo | GoKwik | Firebase | GraphQL | Shopify*

Improved the Bellavita Organic app by fixing UI issues, enhancing filter behavior, and optimizing cart and product interactions.

- Debugged and fixed product filter behavior and UI layout issues across PLP and PDP screens.
- Improved cart state handling for reliable add-to-cart, quantity update, and session persistence flows.
- Optimized screen rendering and data updates, improving overall responsiveness and product discovery experience.

Vilvah — Skincare & Hair Care App *[Play Store & App Store]*

Tech Stack: *Appmaker.xyz | React Native Expo | GoKwik | Firebase | GraphQL | Shopify*

Worked on the Vilvah mobile application focusing on UI consistency, performance, and shopping flow reliability.

- Fixed UI and layout issues across Home, PLP, PDP, Search, Cart, and Checkout for a consistent brand experience.
- Resolved functional issues on PDP interactions, cart updates, and checkout flows.
- Optimized component rendering and data handling, reducing screen load time and improving app responsiveness.

Voyage Eyewear — E-Commerce App *[Play Store & App Store]*

Tech Stack: *Appmaker.xyz | React Native Expo | Firebase | GraphQL | Shopify*

Improved the Voyage Eyewear app by addressing UI stability, cart functionality, and page loading performance.

- Fixed UI spacing and alignment issues across product browsing and listing screens.
- Improved cart and product interaction behavior — add-to-cart, quantity management, and wishlist updates.
- Optimized screen rendering and image loading for faster app response and smoother browsing experience.

House of Masaba — Fashion App *[Play Store & App Store]*

Tech Stack: *Appmaker.xyz | React Native Expo | GoKwik | Firebase | GraphQL | Shopify*

Contributed to the House of Masaba mobile app with UI refinements, functional fixes, and performance improvements.

- Fixed UI inconsistencies across fashion product screens and collection pages.
- Improved cart and checkout behavior with GoKwik integration for faster payment flows.
- Optimized overall app performance for a more polished and stable shopping experience.

House of Rare — Fashion E-Commerce App *[Play Store & App Store]*

Tech Stack: *Appmaker.xyz | React Native Expo | Firebase | GraphQL | Shopify*

Worked on fixing UI issues and improving performance across the House of Rare mobile app.

- Fixed UI and layout issues across product browsing and cart screens.
- Improved browsing performance and optimized screen rendering for smoother interactions.
- Enhanced overall app stability and consistency across iOS and Android builds.

Renee Cosmetics — Beauty App *[Play Store & App Store]*

Tech Stack: *Appmaker.xyz | React Native Expo | GoKwik | Firebase | GraphQL | Shopify*

Improved the Renee Cosmetics mobile app by addressing cart flow issues, UI consistency, and performance.

- Fixed cart and checkout-related issues including quantity updates, coupon application, and order summary accuracy.
- Improved UI consistency across product listing and detail pages.
- Optimized screen performance for a faster and more responsive shopping experience.

ThriveCo — Wellness & Hair Care App *[Play Store & App Store]*

Tech Stack: *Appmaker.xyz | React Native Expo | Firebase | GraphQL | Shopify*

Worked on UI and functional improvements across the ThriveCo mobile app to improve stability and browsing experience.

- Fixed UI and functional issues across product browsing and checkout screens.
- Improved app performance and browsing responsiveness for a more engaging user experience.
- Enhanced app stability and consistency across device sizes and OS versions.

Fashor — Fashion App *[Play Store & App Store]*

Tech Stack: *Appmaker.xyz | React Native Expo | Firebase | GraphQL | Shopify*

Contributed to the Fashor mobile app by resolving UI bugs and optimizing performance across key shopping flows.

- Fixed UI bugs and layout issues across collection browsing and product detail screens.
- Optimized component rendering for faster screen transitions and smoother product browsing.
- Improved app usability and reliability across the full shopping journey.

Super Tails — Pet Products App *[Play Store & App Store]*

Tech Stack: *Appmaker.xyz | React Native Expo | Firebase | GraphQL | Shopify*

Worked on the Super Tails pet products app focusing on UI reliability and performance optimization.

- Fixed UI inconsistencies and layout issues across product and browsing screens.
- Improved cart interactions and app performance for a smoother shopping experience.
- Enhanced overall app stability and user engagement across iOS and Android.

Zouk — Lifestyle & Fashion App *[Play Store & App Store]*

Tech Stack: *Appmaker.xyz | React Native Expo | Firebase | GraphQL | Shopify*

Contributed to the Zouk mobile app with UI fixes, functional improvements, and performance optimization.

- Fixed UI and layout issues across key screens for a more consistent brand experience.
- Improved functional behavior across product browsing and cart flows.
- Optimized app performance for faster screen load times and improved usability.

Client Projects — React Native CLI (B2B Platforms)

Midshires Electrical — B2B Wholesale Platform *[Play Store & App Store]*

Tech Stack: *React Native CLI | Redux | TanStack Query | REST API*

Built a comprehensive B2B e-commerce platform for wholesale operations enabling businesses to manage inventory, process bulk orders, and track shipments.

- Developed responsive mobile application with complex order management system supporting bulk processing and real-time inventory tracking.
- Implemented advanced multi-parameter product filter and browsing system across an extensive electrical and lighting catalogue.
- Integrated TanStack Query for efficient server-state caching, reducing redundant API calls and improving data sync speed — reducing order processing time by 45%.
- Designed role-based access control (RBAC) for different user types and built analytics interface for business reporting and insights.

PrintBind International — B2B Printing Industry App *[Play Store]*

Tech Stack: *React Native CLI | TanStack Query | Firebase | Figma*

Developed a B2B platform specializing in printing and binding services, enabling customers to browse catalogues, customize options, place orders, and track jobs.

- Built document upload and preview system with customizable printing options and dynamic pricing calculator.
- Created detailed product specification viewer with multi-image gallery, PDF datasheet downloads, and technical attributes.
- Implemented direct inquiry workflow with Firebase Cloud Messaging (FCM) for supplier notifications.
- Developed order management and tracking system with status updates and automated workflow notifications.

Personal Projects

RentEase — Full-Stack Property Rental Platform *[GitHub: github.com/Its-Ashu/RentEase]*

Tech Stack: *React Native CLI | Node.js | Express.js | MongoDB | Figma | REST API*

A dual-role rental management application connecting property owners and renters on a single seamless platform without intermediaries.

- Built a dual-role system supporting both property owners (listing management) and renters (discovery & contact) within a single React Native app.
- Created RESTful APIs using Node.js and Express.js for property listings, user management, and location-based search with JWT authentication.
- Implemented location-based browsing with geospatial filtering to help renters discover rental homes across different locations.
- Designed complete UI/UX flows using Figma for smooth property discovery, listing creation, and owner-renter communication.

ShopEZ — Smart Mall Shopping App *[GitHub: github.com/Its-Ashu/ShopEZ]*

Tech Stack: *React Native CLI | Redux | Figma*

College final year project — a mall-based product discovery app enhancing the in-store shopping experience with text-based location guidance for products.

- Built an e-commerce-style product discovery interface displaying all mall products with floor and section location details — without online checkout.
- Used Redux for managing product listings, search state, and app navigation across multiple screens.
- Designed complete UI/UX using Figma and implemented reusable React Native components for scalability and smooth navigation.
- Solved real in-mall navigation pain points — shoppers can locate products across floors and sections without wandering.

eWallet — Finance Management App *[GitHub: github.com/Its-Ashu/eWallet-Finance-Saving-Mobile-App]*

Tech Stack: *React Native CLI*

A finance management mobile application focused on helping users visualize and manage expenses, savings, and transaction history through an intuitive UI.

- Developed clean and intuitive screens for balance overview, transaction history, and spending insights using React Native.
- Implemented reusable components for finance-related UI patterns with consistent design and spacing across multiple screens.
- Focused on smooth navigation, performance optimization, and responsive layouts for different screen sizes and resolutions.

Expense Tracker App — Full-Stack Finance App *[GitHub: github.com/Its-Ashu/ExpenseTrackerApp]*

Tech Stack: *React Native Expo | TypeScript | Node.js | Express.js | MongoDB | Firebase*

A full-stack personal finance management application for recording daily expenses, categorizing spending, managing budgets, and analyzing financial data.

- Built cross-platform mobile frontend using React Native Expo and TypeScript with type-safe component architecture across all interfaces and API models.
- Developed RESTful APIs using Node.js, Express.js, and MongoDB in TypeScript with secure CRUD operations for expenses and budgets.
- Implemented category-wise expense management, budget limits, and Firebase-based authentication for user session management.
- Designed scalable backend architecture with aggregation pipelines for monthly financial reports and budget utilization metrics.

Furniture App — UI Showcase *[GitHub: github.com/Its-Ashu/Furniture-App]*

Tech Stack: *React Native CLI | Figma*

A modern furniture shopping mobile app with a fully custom UI designed in Figma and implemented in React Native — demonstrating Figma-to-code implementation skills.

- Designed complete UI/UX for the application in Figma with a clean, mobile-first approach and modern aesthetic.
- Converted Figma designs into reusable React Native components with product listing screens, category filters, and smooth navigation.
- Optimized component rendering to ensure smooth scrolling, transitions, and responsive layouts across different device sizes.

EDUCATION

Bachelor of Technology — Information Technology (B.Tech IT) *Aug 2021 – Apr 2025*

Bhagwan Arihant Institute of Technology, Gujarat, India

- Specialized coursework: Mobile Application Development, Software Engineering, Data Structures & Algorithms, Database Management, Web Technologies, IT Fundamentals.
- Final Year Project: ShopEZ — full React Native + Redux mall shopping app with Figma-designed UI, demonstrating end-to-end product development lifecycle.

ACHIEVEMENTS & RECOGNITION

- Delivered 15+ production-ready mobile applications serving thousands of active users across international markets.
- Achieved up to 50% improvement in app performance (load times, rendering speed, API latency) across major brand projects including GNC India.
- Simultaneously contributed to 13+ live Shopify-integrated mobile apps while maintaining code quality and meeting all project deadlines.
- Recognized by management and clients for clean, maintainable code architecture, efficient debugging workflows, and meticulous UI attention to detail.
- Built and open-sourced 5+ personal projects spanning fintech, property tech, retail, and furniture — demonstrating initiative and technical breadth beyond client work.
- Streamlined B2B order processing for Midshires Electrical, reducing processing time by 45% through optimized architecture and caching strategies.
