

ASHISH PIPALIYA

Building High-Performance Mobile Experiences With React Native

ABOUT ME

I'm a React Native Developer with over 2.5 years of experience building high-performance mobile apps. I've developed 15+ projects, including well-known brands like GNC, Kalki, Vilvah, and Bellavita. Skilled in React Native, JavaScript, TypeScript, Redux, Firebase, and MERN, I focus on crafting clean designs, smooth user experiences, and reliable app functionality.

LANGUAGE & SKILLS:

Frontend :-

- React Native CLI
- RN Appmaker
- Typescript
- Redux toolkit
- React Native Expo
- Javascript
- Redux
- TanStack Query

Backend & DB :-

- Node.js
- Mongo DB
- Firebase
- Express.js
- RESTful APIs
- Supabase

Payments & Integrations :-

- Zecpay
- Appsflyer
- GraphQL Queries
- GoKwik
- API Integration

Tools & Platforms :-

- Git-Github
- Android Studio
- Postman
- Figma
- Shopify Dashboard
- Xcode
- Flipper
- Adobe XD

EDUCATION:

B.Tech IT – Bachelor of Technology In Information Technology (Aug 2021 – April 2025)

- Bhagwan Arihant Institute of Technology
- Specialised coursework in app development, covering programming languages, software development, and IT fundamentals.

EXPERIENCE

SARVAGYA SOFTTECH

(June 2023 – July 2024)

Full-stack Developer

- Built full-stack mobile applications integrating React Native frontend with Node.js and MongoDB backend.
- Designed user-friendly UI with optimized API performance and responsive layouts.

(Tools: React Native, Node.js, MongoDB, Express)

DYNAMIC DREAMZ

(Aug 2024 – Current)

React Native Developer

- Improved app performance and UI/UX across 8+ major e-commerce brands using Appmaker (React Native).
- Collaborated with cross-functional teams to deliver responsive and high-quality mobile apps.

PROJECTS & WORK

Worked on 15+ mobile applications across e-commerce, finance, and B2B domains, focusing on UI/UX enhancement, performance optimization, and full-stack development.

Personal Projects:-

1. RentEase App :-

[GIT-Repo](#)

Tech Stack : Figma | React Native | CLI | MERN

- Developed a full-stack property rental platform with features for listing spaces, renter preferences, chat, and location-based searches. Designed to simplify renting through direct communication and smart matching for owners and tenants.

2. ShopEZ App :-

[GIT-Repo](#)

Tech Stack : Figma | React Native | CLI

- Created a mall shopping app with real-time navigation, personalized promotions, and seamless checkout. Enhanced in-store experience by combining convenience, smart search, and robust customer support.

3. eWallet :-

[GIT-Repo](#)

Tech Stack : React Native | CLI

- Built a mobile wallet to manage personal finances, budgets, and transactions. Integrated dashboards, expense analytics, and secure tracking to help users monitor spending effortlessly.

4. Expense Tracker App

[GIT-Repo](#)

Tech Stack : React Native | Expo | Typescript | MERN

- Developed a finance management app that allows users to add, edit, and categorize expenses, set monthly budgets, and visualize spending through interactive charts. Focused on creating a smooth UI with real-time analytics for better financial insights.

Clients Projects:-

5. Midshires :-

Tech Stack : React Native | Redux | TanstackQuery

- Built a B2B platform for buying and selling electrical and lighting products. Simplified product discovery and order management for users through improved browsing and filter functionalities.

6. PrintBind International :-

Tech Stack : Figma | React Native | Redux | CLI | Firebase

- Designed a B2B app connecting clients with printing ink and machinery suppliers. Enabled product exploration, detailed specification viewing, and direct inquiries for efficient business communication.

7. GNC India :-

Tech Stack : Appmaker | React Native | EXPO | Zecpay | GoKwik | Appsflyer | Firebase | GraphQL

- Enhanced the supplement store app with better product listing filters, smoother checkout flow, and optimized UI for improved shopping performance and customer satisfaction.

8. Bellavita Organic :-

Tech Stack : Appmaker | React Native | EXPO | GoKwik | Firebase | GraphQL

- Refined the fragrance app by implementing smoother product filters, cart management, and interactive product pages. Focused on creating a visually appealing and fast experience.

9. Voyage Eyewear :-

Tech Stack : Appmaker | React Native | EXPO

- Developed an e-commerce eyewear app emphasizing fast loading, product previews, and seamless cart functionality. Improved shopping interaction and app responsiveness.

10. Kalki Fashion :-

Tech Stack : Appmaker | React Native | EXPO

- Optimized luxury ethnic wear app with enhanced navigation, search, and category filters. Improved app speed and gallery performance for a premium user experience.

Key Achievements:-

- Delivered 15+ production-ready mobile apps for international clients.
- Improved app performance by up to 30% across major brand projects.
- Recognized for clean UI implementation and efficient debugging.
